Q2

Comment about University Dr. Please note any specific locations or intersections.

University drive is horrible for pedestrians and cyclists. The street is too wide, with almost no crosswalks. The buildings are set too far back from the street. The street is designed for cars to go 70 mph, cycling is very dangerous. Sidewalks are always closed due to some construction or other, and are very confusing, as a pedestrian I'm not sure when I need to go to the access road and where the sidewalk on University itself ends. The sidewalk around the Broward Mall is horrible and forces peds into the ditch or around the other side of the mall. Right-size the lanes to 10 feet or 11 feet, make the cycle lanes protected, remove setbacks and plant trees, and replace general traffic lanes with transit only lanes.

Q3

Comment about Nob Hill Rd. Please note specific locations or intersections.

More pedestrian friendly and great shading from trees. Width is good, as cars don't tend to speed much here like they do on wider roads. Main problem is lack of connectivity, there are very few destinations, and what there is very far apart. Most of the street is walled off from residential subdivisions. The street is walkable, but has nowhere to walk to.

Q4

Comment about Cleary Blvd. Please note specific locations or intersections.

Good width, very little speeding. Generally has good connectivity, as it connects parks, shopping, schools, and some neighborhoods. Main problem is that during school days, parents park on the road itself and block everything for hours. Street needs more trees, protected bike lanes, and wider sidewalks, along with a "safe route to school" designation so parents walk or cycle with children rather than drive. They don't live more than a mile or two away! The road should not be widened! Also, as an acres resident I would love to have a ped/bike bridge over the Hiatus Canal, it would allow me to save half an hour on a walk into the rest of the city.

Q5

Comment about other roadways. Please specify roadway in your comment.

The arterial roads in our city are walls that cut the city into pieces. Broward, Sunrise, and Pine Island are designed to discourage people from crossing the street. With right turn on red, drivers don't even check for pedestrians in the crosswalk before turning, I've seen many people come within inches of getting run over and I myself have almost been hit by inattentive drivers who only look to their left. We also need much more frequent crosswalks, our blocks are too long, and you might need to walk more than half a mile out of your way to cross an 8+ lane street. Our sidewalks are very narrow, where we do have bike lanes they are unprotected, and we lack tree coverage over most of our arterials.

Q6

Please share any other comments about transportation in Plantation.

The design of the streets themselves is only half the issue. The other half is land use. When we divide residential from commercial, with long distances in between, we force people to drive. If we rezone to encourage mixed-uses, we incentivize people to walk or bike instead of drive, because the distances they travel are much shorter. At minimum, all of our arterials should be zoned for mixed-uses on the properties fronting the arterial until a block or two off. This would also encourage transit ridership, as most of the new development would be served by frequent bus routes (and maybe we can encourage PREMO to include BRT or LRT on our arterials like University and Broward). Finally, mandating lots of parking for new development also encourages people to drive instead of walk, bike, or take transit. Parking lots make places unpleasant to walk in, and make distances between buildings much larger. Decreasing the amount of parking is necessary to get people out of their cars.

I would like to point out an area located on the East side of University Drive. I am referring to the corner of Broward Blvd and N. Fig Tree Ln (NW 59Ave) where the sidewalk (on the north side) disappears along NW 59 Ave. It is important to have this sidewalk in order for pedestrians to continue walking/biking/running along and consider this route as a connection to areas such as Helen B. Hoffman Plantation Library, Plantation Woods Park, Plantation Museum, Publix (back entrance) to name a few in order to avoid all the fast moving cars along Broward Blvd. Thank you for your consideration and the opportunity to bring forth via this forum. Good Job !

As a biker, I do not like shared road options, but would rather have protected separate bike lanes. In addition , it seems most drivers of vehicles do not understand that the pedestrian has the right of way in the crosswalk when that pedestrian has the crossing light in their favor. Maybe an educational component is a good idea to remind vehicle drivers and bikers of the law regarding crosswalk safety.

Comment about University Dr. Please note any specific locations or intersections.

High congestion especially southbound from Cleary and north bound after tower shops. The drivers are crazy sometimes cutting across lanes not to mention overt disregard for traffic rules. The new bus stop they made North bound on east side of University defies logic as now it's going to cause even more congestion.

Q3

Comment about Nob Hill Rd. Please note specific locations or intersections.

Very pleasant road that should try to avoid added traffic which will undermine the serenity and properties in the area. Keep bus traffic out!

Q4

Comment about Cleary Blvd. Please note specific locations or intersections.

Cleary east of 63rd Ave is attracting crazy drivers that do not care about speed limits whatsoever. I've seen them doing donuts in the middle of the intersection of Cleary and 63rd Ave. Where are the police to catch all these lunatics!?

Q5

Comment about other roadways. Please specify roadway in your comment.

I want to keep Platnation safe and secure from all the crime of SR7 and east. I want to see less traffic, particularly bus traffic. I want to see more respect for our traffic laws, particularly catching law breakers coming westbound on Cleary. Plantation used to be safe, clean cut, homes well kept by neighbors.

Q6

Please share any other comments about transportation in Plantation.

Please, don't attract more ublic transportation. This attracts folks to our neighborhood we do not want. Crime and vandalism will increase with more folks on the streets coming in via busses.

I'm very pleased that we're building more bike and pedestrian infrastructure. I use the Hiatus Greenway for exercise several times a week. I live near Broward and Nob Hill and would like to see more paths nearby. I noticed Pine Island Rd speed limit was lowered to 35 some time ago and I love that. Bicyclists are safer when cars go slower, and when they have dedicated lanes at a minimum, and even better, paths with grass or barriers protecting them from cars.

Q2

Comment about University Dr. Please note any specific locations or intersections.

How about quit building so much multi-unit housing that you(the politicians) have created a road that is congested 24/7. Your solution to put a traffic light every hundred feet is not the answer either. The only way you can solve the mess you have made of University Dr. is to have a feeder side road that could feed cars into University from every strip mall and apartment building you have approved and developed. Then you could remove many of the traffic lights except for a few main intersections. Politicians stupid excuses of these *wonderful* multi-use buildings, "no one is going to want a car, they just work and play and shop in their own little area" is just stupid liberal b.s.

A bike path was approved many years ago for Cypress Rd, it didn't take wasting taxdollars to study this. It did take Mayor Veltri to conveniently have it stopped before the path made it past his house though. More stop signs on Cypress Rd is not the answer, when finishing the bike path would solve foot and bike problems.

Q6

In spite of your liberal fantasies, the majority of people are not giving up their cars for buses, bicycles, Uber etc. Broward County needs a building moratorium if we ever want to solve the increasingly worse traffic.

Time the lights. Traffic backs up at I595 and 84. Way too much going on at that intersection

Q3

during rush hour, traffic backs up on the corridor from Broward Blvd to McNab. Need a turn signal out of Jacaranda Lakes at 12th St. There are many times that cars run the light. I always have to look both ways before proceeding into the intersection. too many accidents. Need to slow cars down. Residents walk over to the park. It's really bad and dangerous

University Dr. has extremely too much traffic congestion especially in the State Rd 84/Davie area. The improvements that are going now close to Peter's Rd is taking entirely too long to complete.

Nob Hill is okay but sometimes drivers speed and go way to fast both north and south bound. More traffic enforcement is needed before and after school especially in the area surrounding Central Park Elementary. During the time hurricanes and preparations are being made traffic around the school is bad and there still should be signs flashing and cross guards available to help kids and families cross when Broward county school system has yet to decide to cancel school. During the approach of Hurricane Ian my 5 year old and wife were almost struck and nearly hit by a landscaping city truck. Any improvement around the school is vital and necessary. A roundabout at the intersection is a good idea.

I hope that the City will also look into traffic on Sunrise where all the subdivisions require left turns to merge into traffic going west. Many of those residents attempt to cross 3 lanes of traffic to get onto the east bound lanes. It is very dangerous for cars driving west and have to negotiate around them.

Q2

Comment about University Dr. Please note any specific locations or intersections.

So much to fix. Several good ideas here as well as bad. Forget "sharrows" and "share the road" signage. Use infrastructure like continuous sidewalks (raised) and protected bike lanes to protect pedestrians and cyclists. Would you let your kids on bicycles "share the road" with our car traffic? Cmon, lets prioritize safety.

Q3

Comment about Nob Hill Rd. Please note specific locations or intersections.

Good stuff here as well. Same thoughts on signage and infrastructure. Let's stop with more "guard rails" and intelligently slow traffic.

Q4

Comment about Cleary Blvd. Please note specific locations or intersections.

Like what I see here. The idea of connecting communities (and the Greenway) using a bridge over the Hiatus canal is great. Protected bike lanes for safety, less motorized lanes, and traffic circles will create a safer, more community spirited roadway.

Q5

Comment about other roadways. Please specify roadway in your comment.

SR 84 westbound and Hiatus intersection. REMOVE the slip lane going north. This crosses the Greenway and is extremely dangerous for pedestrians and bicyclists.
